

INSTALL INSTRUCTIONS

Install for original Microsoft flight simulator x plus acceleration
RDJ SIMULATIONS EXTREME AIRLINE FSX

FSX ACCELERATION EXPANSION PACK IS REQUIRED FOR THESE MISSIONS TO
APPEAR OR WORK

If you do not have MS acceleration installed then get it first and
install it.

INSTALL FOR WINDOWS 7 FOLLOW THESE DIRECTIONS

The installer will install Extreme airline FSX (By default) to the
(newer) Windows 7 directory

C:\program files (x86)\Microsoft games\Microsoft flight simulator x.

Most FSX users seem to have windows 7 now so having

the installer auto install to this location should be best.

Run the installer. Click (Next) then click (Next) again Then click
(Yes) to install into this folder anyway--(Start) The addon will
install the addon into your FSX directory. Extreme airline FSX does
not overwrite any of your files. It simply inserts the needed files
into your FSX

The installer will put all of the files into your Flight simulator X
directory and finish and you are about ready to go. There is (NO)
scenery activation required. To uninstall-- go to your all programs
in control panel and find the game Extreme airline FSX and
uninstall it.

READY TO GO

HOW TO FIND THE MISSIONS

Load your FSX. Next in the left area click on the (Missions) tab.
Next in it at the top click in the (Category:) scroll box. Scroll
down in it until you find (RDJ EXTREME AIRLINE) You are now in.
Choose a mission and click the (Fly now) button at the bottom.

OPTIONAL INSTALL OPTIONS

IF YOU HAVE VISTA OR XP (OR IT IS ON ANOTHER DRIVE) FOLLOW THESE
DIRECTIONS

These older operating systems install FSX to C:\program files
\Microsoft games\Microsoft flight simulator x . Which is a different
path from the newer windows 7.

1 Using the installer to get the game into the older XP or Vista
location.

Start the installer and click (Next) On the right is a (Browse box)
(...) Click it to browse to (C:\program files\Microsoft games
\Microsoft flight simulator x) Click start to install there. To
uninstall-- go to your all programs in control panel and find the
game EXTREME AIRLINE FSX

MANUAL INSTALL

Some customers prefer to do a manual install so they can see
everything that will be going into their FSX. Or you may have
problems figuring out the above installer. This method simply tells

you how to use the installer as an extractor. The disadvantage is that there will be (No uninstaller) so an uninstall will have to be done manually—See below

Manual install

Create a new folder onto your desktop and then run the installer and browse to the desktop\new folder and install it into it. You can then open it (New folder) and manually copy all the folders and overwrite them into your FSX main directory. These folders are (Categories,Effects, Missions,SimObjects and Sound) Left click,scroll and highlight all 5 folders and then right click..then click (Copy) from the selections. Next browse to wherever you have Flight simulator x installed and open the (Microsoft flight simulator x) folder and right click the mouse and click (Paste) You will then get overwrite? messages.. click yes to all throughout. You can also open each of the 5 folders and so on copying and pasting into each individual folder. That is for those who wish to see and check in detail what goes in.

Manual uninstall

Most of the EXTREME AIRLINE FSX folders and files begin with RDJ_EA -For instance in the effects folder one of the effects are (RDJ_EA_CastawayFire.fx) for example. So if you wish to uninstall just look in each folder for anything that begins with RDJ_EA

STEAM

Install for Microsoft flight simulator x (Steam) version
FSX with steam seems to be installed in (C:\games\Microsoft Flight Simulator X - Steam Edition)-- a different location

IF YOU HAVE THE STEAM FSX VERSION FOLLOW THESE DIRECTIONS

Use the (other) installer (RDJ Extreme airline STEAM version setup) from this pack and follow same directions as above.

Check out other RDJ SIM ADDONS under (RDJ SIMULATION)
