

INSTALL INSTRUCTIONS

Install for original Microsoft flight simulator x plus acceleration
(OR) Microsoft flight simulator x Steam edition
RDJ SIMULATIONS FSX TOP GUN

FSX ACCELERATION EXPANSION PACK IS REQUIRED FOR THESE MISSIONS TO APPEAR OR WORK IF YOU JUST HAVE FSX

If you do not have MS acceleration installed then get it first and install it. (Steam Edition already has it so good to go there)

INSTALL FOR WINDOWS 7 FOLLOW THESE DIRECTIONS

The installer will install RDJ FSX TOP GUN (By default) to the (newer) Windows 7 directory

C:\program files (x86)\Microsoft games\Microsoft flight simulator x. Most FSX users seem to have windows 7 now so having the installer auto install to this location should be best.

Run the installer. Click (Next) then click (Next) again Then click (Yes) to install into this folder anyway--(Start) The addon will install the addon into your FSX directory. RDJ FSX TOP GUN does not overwrite any of your files. It simply inserts the needed files into your FSX

The installer will put all of the files into your Flight simulator X directory and finish and you are about ready to go. There is (NO) scenery activation required. To uninstall-- go to your all programs in control panel and find the game RDJ FSX TOP GUN and uninstall it.

READY TO GO

HOW TO FIND THE MISSIONS

Load your FSX. Next in the left area click on the (Missions) tab. Next in it at the top click in the (Category:) scroll box. Scroll down in it until you find (RDJ_TOPGUN) You are now in. Choose a (RDJ_TOPGUN) mission and click the (Fly now) button at the bottom.

OPTIONAL INSTALL OPTIONS

IF YOU HAVE VISTA OR XP (OR IT IS ON ANOTHER DRIVE) FOLLOW THESE DIRECTIONS

These older operating systems install FSX to C:\program files \Microsoft games\Microsoft flight simulator x . Which is a different path from the newer windows 7.

1 Using the installer to get the game into the older XP or Vista location.

Start the installer and click (Next) On the right is a (Browse box) (...) Click it to browse to (C:\program files\Microsoft games \Microsoft flight simulator x) Click start to install there. To uninstall-- go to your all programs in control panel and find the game FSX RDJ TOPGUN

MANUAL INSTALL

Some customers prefer to do a manual install so they can see everything that will be going into their FSX. Or you may have

problems figuring out the above installer. This method simply tells you how to use the installer as an extractor. The disadvantage is that there will be (No uninstaller) so an uninstall will have to be done manually—See below

Manual install

Create a new folder onto your desktop and then run the installer and browse to the desktop\new folder and install it into it. You can then open it (New folder) and manually copy all the folders and overwrite them into your FSX main directory. These folders are (Categories,Effects, Missions,SimObjects and Sound) Left click,scroll and highlight all 5 folders and then right click..then click (Copy) from the selections. Next browse to wherever you have Flight simulator x installed and open the (Microsoft flight simulator x) folder and right click the mouse and click (Paste) You will then get overwrite? messages.. click yes to all throughout. You can also open each of the 5 folders and so on copying and pasting into each individual folder. That is for those who wish to see and check in detail what goes in.

Manual uninstall

All of the (FSX RDJ TOPGUN) folders and files begin with FSX RDJ TOPGUN –For instance in the effects folder one of the effects are (RDJ_TOPGUN_B52_Strike3.fx) for example. So if you wish to uninstall just look in each folder for anything that begins with RDJ_TOPGUN

STEAM

Install for Microsoft flight simulator x (Steam) version
FSX with steam seems to be installed in (C:\games\Microsoft Flight Simulator X – Steam Edition)-- a different location

IF YOU HAVE THE STEAM FSX VERSION FOLLOW THESE DIRECTIONS

Use the (other) installer (RDJ FSX TOP GUN Steam edition setup) from this pack and follow same directions as above.
